GREEN FLYWAY

INTERNATIONAL TEST ARENA

ÖSTERSUND IS LOCATED in the Scandinavian mountain range.

❑ The airspace is extensive and has relatively few flight movements.

❑ Possibility to fly between two countries, Sweden and Norway.

❑ Östersund is known for its bitter winter climate, large amounts of snow, challenging wind conditions and strong cold. The summers are short and often offer rapidly varying weather, one day hot and dry weather, the next day heavy rain, strong winds and occasionally even snow in the higher regions.

❑ IN OTHER WORDS: All the circumstances are met for the ultimate test of electric aircraft and drones. Everything is ready. Welcome!

Green Flyway Östersund is situated close to the train station (six km) and the airport (1 km). Local buses stops outside the hangar. 1 hour flight to Stockholm, capital of Sweden. 4 - 6 h with train.

GREEN FLYWAYS ultra-modern hangar was built to serve JAS 39 Gripen, Sweden's famous fighter aircraft.

Now the hangar is ready to meet your needs. The hangar is situated only 250 meters from the airport's runway. This means a short taxiing of your aircraft before take-off and after landing.

Close to the hangar is the engine test facility which is suitable for short or longer tests of your engines or constructions.

TEST ARENA CONTEXT

❑ **EMC LABORATORY:** Regardless of the product, its electronic systems must work together in the environment in which they are intended to be used. The systems should also not be affected by systems in other products or in turn interfere with them. This is known as EMC electromagnetic compatibility. Green Flyway Östersund works closely with SAAB's EMC laboratory in Östersund and assists you in booking tests. The laboratory is only 12 kilometers from Green Flyway's hangar.

❑ **FIRST AID/FIRE SERVICES/HOSPITAL:** During the winter test center's opening hours, a professional first aid service on call is on site. Only 10 minutes to hospital.

❑ **CHARGING:** Aircraft charging infrastructure close to hangar.

❑ **CONFERENCE CENTER:** 40,000 sqm of hangar space including conference center & office.

❑ **COMMUNICATIONS:** Remote Tower, fiber, Internet, telecommunications, mobile networks and RTK GPS coverage.

❑ **MAINTENANCE:** MRO, Workshops for maintenance, repair and overhaul of helicopters and general aircraft. National service center for heavy maintenance of helicopters. Workshop service on request, we offer a variety of services.

❑ **RESEARCH AND DEVELOPMENT:** Research and development closely linked to the university and aerospace industries as well as the test arena. AIM: Manufacturer of industrial components in metal and plastic using additive manufacturing (3D printing).

❑ **NATIONAL HELICOPTER SERVICE CENTER:** Heavy maintenance for helicopters.

❑ **WORKSHOP SERVICE:** If you need services at our workshop, please contact us to discuss the scope of work.

❑ **COMPANIES AT THE AIRPORT TODAY, FOR EXAMPLE:** Storm Heliworks, SAAB aircraft workshop, police helicopters, Babcock Scandinavian Air Ambulance, Vericate Testing, etc.

❑ Östersund is the region's cultural and economical centre and by tradition a city of trade and commerce.

❑ The city is the Mid Sweden University's largest campus site with approximately 3 000 students.

❑ Population in Östersund Municipality is 64 110. Population growth 2010–2035 is estimated at +3 percent.

❑ Östersund is situated in inland Scandinavia and connected to Sundsvall in the east on the Swedish coast, and Trondheim in the west at the shores of the Norwegian Sea.

❑ Östersund has had a long history as a centre of outdoor activities with a modern cross-country ski stadium and an actual piste in the city itself.

❑ Östersund has hosted several World Championships in various sports such as biathlon, speed skating and ski orienteering along with Swedish National Championships in cross country skiing and snowcross.

❑ Over the past year, the city has received large company establishments in the manufacturing industry.

GREEN FLYWAY
INTERNATIONAL TEST ARENA

- ❑ Green Flyway is a unique test arena for Electric aircraft, UAS, ATS and ground support.
- ❑ Located in the middle of Sweden and Norway. We offer an unique test environment with two international and several other airports.
- ❑ A cluster of manufacturers of Industrial components in metal and plastics using additive manufacturing, Universities, research institutions and Aviation industry.

- ❑ Within Green Flyway, Östersund works closely with the municipality of Rörös in Norway. Together we can offer the world's most interesting airspace when it comes to demanding climates, topography and wind conditions.
- ❑ We collaborate with other municipalities and authorities in the development of future electric aviation.

Green Flyway is working intensively to develop the test operations that were affected during the Corona pandemic. In the early summer of 2021, it looks like the business can start up during the summer and autumn.

Contact us today. You will receive quick feedback and a plan for how your test activities can be realized.

Welcome!
